

# HICKS BEEF BULL SALE

**Thursday 2nd March 2023**  
**1.00pm HOLBROOK**

**SALE VIDEOS**  
[www.hicksbeef.com.au](http://www.hicksbeef.com.au)  
[www.auctionsplus.com.au](http://www.auctionsplus.com.au)

LOT 2 - ABC S815

LOT 5 - ABC S675

LOT 7 - ABC S665

LOT 11 - ABC S764

LOT 12 - ABC S875

LOT 13 - ABC S761

LOT 18 - ABC S807

LOT 21 - ABC S909

# HICKS BEEF BULL SALE

**Thursday 2nd March 2023**

**Breakfast in the sale barn with  
Jackie Atkins and Luke Bowman  
from ASA & IGS 8.30am**

(see page 5 for details)

**Inspections from 10.00am**

**Sale Commences: 1.00pm**

Auction in the sale barn with video presentation of each lot. All lots will be penned for your inspection on sale day. We encourage you to call and arrange an inspection prior to sale day.

**39 Black Composite Bulls  
16 Red Composite Bulls  
16 Red Angus Bulls**

**Andrew Hicks  
M: 0427 147 258**

**Tom Hicks  
M: 0448 796 124**

**Email:** tom@hicksbeef.com.au or aahicks@bigpond.com  
**Website:** www.hicksbeef.com.au (visit for link to video of sale bulls)

**This sale is interfaced with AuctionsPlus**

Our sale is conducted live on line in real time; remote bidders can bid on computers at their location. The remote bid is immediately transferred to the auction ring.

**Bidding is only available to registered AuctionsPlus users**

You must register at least 24 hours prior to sale with AuctionsPlus.

**Phone:** 02 9262 4222 **W:** www.auctionsplus.com.au

**Phil Gledhill 0407 078 094**

**Jenni O'Sullivan 0428 222 080**

**2% REBATE  
to Outside Agents**

We have poor mobile phone reception at our sale ring. Please call Phil from Elders to organise phone bidding.

# RED ANGUS GROUP BREEDPLAN

**ESTIMATED BREEDING VALUES (EBVs)** The EBV is the best estimate of an animal's genetic merit for that trait.

**ACCURACY:** Accuracy is based on the amount of performance information available on the animal and its close relatives - particularly the number of progeny analysed. The higher the accuracy value the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives. Even though an EBV with a low accuracy may change in the future, it is still the best estimate of an animal's genetic merit for that trait.

**Gestation Length EBV (days)** is an estimate of the time from conception to the birth of the calf and is based on ASI and hand mating records. Lower (negative) GL EBVs indicate shorter gestation length and therefore easier calving and increased growth after birth.

**Birth Weight EBV (kg)** is based on the measured birth weight of progeny, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

**200-Day Growth EBV (kg)** is calculated from the weight of progeny taken between 80 and 300 days of age. Values are adjusted to 200 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

**400-Day Weight EBV (kg)** is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

**600-Day Weight EBV (kg)** is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

**Mature Cow Weight EBV (kg)** is based on the cow weight when the calf is weighed for weaning, adjusted to 5 years of age. This EBV is an estimate of the genetic difference in cow weight at 5 years of age and is an indicator of growth at later ages and potential feed maintenance requirements of the females in the breeding herd. Steer breeders wishing to grow animals out to a larger weight may also use the Mature Cow Weight EBV.

**Milk EBV (kg)** is an estimate of an animal's milking ability. For sires, this EBV indicates the effect of the daughter's milking ability, inherited from the sire, on the 200-day weights of her calves. For dams, it indicates her milking ability.

**Scrotal Size EBV (cm)** This EBV is an estimate of an animal's genetic merit for scrotal size. There is also a small negative correlation with age of puberty in female progeny and therefore selection for increased scrotal size will result in reduced age at calving of female progeny.

**Carcase Weight EBV (kg)** is based on abattoir carcass records and is an indicator of the genetic differences in carcass weight at the standard age of 650 days.

**Eye Muscle Area EBV (sq cm)** This EBV estimates genetic differences in eye muscle area at the 12/13th rib site of a 300 kg dressed carcass. More positive EBVs indicate better muscling on animals. Sires with relatively higher EMA EBVs are expected to produce better-muscled and higher percentage yielding progeny at the same carcass weight than will sires with lower EMA EBVs.

**Rib Fat and Rump Fat EBVs (mm)** are calculated from measurements of subcutaneous fat depth at the 12/13th rib site and the P8 rump site and are adjusted to a standard 300 kg carcass. These EBVs are indicators of the genetic differences in fat distribution on a standard 300 kg carcass. Sires with low, or negative, fat EBVs are expected to produce leaner progeny at any particular carcass weight than will sires with higher EBVs.

**Retail Beef Yield EBV (%)** indicates genetic differences between animals for retail yield percentage in a standard 300 kg carcass. Sires with larger EBVs are expected to produce progeny with higher yielding carcasses.

**Intramuscular Fat EBV (%)** is an estimate of the genetic difference in the percentage of intramuscular fat at the 12/13th rib site in a 300 kg carcass. Depending on market targets, larger more positive values are generally more favourable.

*For further information please contact the Red Angus Society or Red Angus BREEDPLAN.*

# GET THE LATEST INFORMATION ON BETTER BEEF PRODUCTION

---

**Hicks Beef Sale Day Breakfast 8.30am Sale Day Thursday 2nd March with Dr Jackie Atkins and Luke Bowman from the U.S.**

**Find out how Breed Indexes promote long term, balanced, profitable decisions.**

**Find out about Genomics giving breeders more information to make better, more accurate decisions.**

We are excited to have Dr Jackie Atkins and Luke Bowman, from the American Simmental Association and International Genetic Solutions, attending our Autumn Bull Sale.

We invite you to join us for breakfast in the sale barn at 8.30 am on sale day. This will be a great opportunity for our clients to hear Luke and Jackie talk about the IGS evaluation and genomics.

**DR JACKIE ATKINS**

Dr Jackie Atkins serves as the Director of Science and International Genetic Solutions (IGS) Operations. The genetic evaluation at IGS is the largest beef cattle genetic evaluation on the planet and serves 20 different breed organizations in the US, Canada, Australia, and New Zealand. In her time with the ASA and IGS, Jackie has worked closely with research, data collection, and member education. Jackie has launched and coordinated new data collection programs; helped to advance DNA technology; promoted member education through articles, speaking engagements, and webinars; developed genomic research programs; coordinated other research projects; and provided leadership for the IGS genetic evaluation team and collaborators.

**LUKE BOWMAN –  
Director of SimGenetics Development,  
American Simmental Association**

In a recent interview about his upcoming visit to Australia, Luke Bowman said..... “I am going down to visit with a lot of producers and ranchers to help them understand our genetic evaluation and help them understand pedigrees, help them understand why Simmental are generally solid coloured and polled today compared to what they were 30 years ago. It is going to be a great trip,”

**We are looking forward to their visit and hope you can join us for breakfast, to assist with catering, could you please RSVP to Kate 0409 794 697 if you plan to join us at 8.30 am sale day.**

# ALL SALE BULLS GENOMICALLY ENHANCED FIGURES

Adding a DNA test to your decision is like knowing...

- ◆ 25+ calving ease scores
- ◆ 22 birth weights
- ◆ 25+ weaning weights
- ◆ 25+ yearling weights
- ◆ Stayability / productivity records on 15 daughters
- ◆ 6 carcass weights
- ◆ 10 marbling scores
- ◆ 8 ribeye area measurements

All this from a test you can complete before you wean the calf.

**MORE ACCURATE FIGURES = BETTER BUYING DECISIONS**

## INDEPENDENT STRUCTURAL ASSESSMENT

### How to Use The Beef Class Structural Assessment System

The Beef Class Structural Assessment System uses a 1-9 scoring system:

- A score of **5** is ideal (Note: Except for Temperament where a Score of 1 is ideal);
- A score of **4 or 6** shows slight variation from ideal, but this indicates most animals. An animal scoring 4 or 6 would be acceptable in any breeding program;
- A score of **3 or 7** shows greater variation but would be acceptable in most commercial programs.

However, seedstock producers should be vigilant and understand that this score indicates greater variation from ideal;

- A score of **2 or 8** are low scoring animals and should be looked at closely before purchasing;
- A score of **1 or 9** should not be catalogued and are considered culls.

Liam Cardile on 0409 572 570

# API – Profit Based on Fertility

API – the profit index that shows us where our priorities should be. The All Purpose Index weighs up the \$ inputs and outputs of beef production.

The big drivers of profit are stayability (a measure of how long a cow remains in the herd) a measure of fertility and soundness. Followed by cow herd intake (mature cow size), calf survival and heifer pregnancy. Yes, fertility, soundness and live calves make up the priority for breeders chasing higher returns, before weaning weight, carcass weight and feedlot intake.

## Vet Check Information

All bulls presented in the auction have been fertility tested by the Holbrook Veterinary Clinic. They have passed an examination of their reproductive tract, which includes a testicular palpation, internal reproductive organ palpation and penis check. General health and structure are part of the course for this veterinary examination. Service ability testing and semen assessment have not been performed and we encourage all purchases to integrate their new bulls into the risk mitigation strategy that they employ back home.

# QUICK GUIDE TO EPDS

**CE**  
**Calving Ease**

- 375,000+ animals recorded annually
- 500 Sires progeny tested (now 60-70 per year)
- 35,000 matings on Angus Heifers (progeny tested)

**BW**  
**Birth Weight**

**MM**  
**Maternal Milk**

**DOC**  
**Docility**

**CW**  
**Carcass Weight**

**YG**  
**Yield Grade**  
(Lower ranks higher on percentile table)

**API**  
**All Purpose Index**

(Dollars per cow exposed in a self replacing herd bred to both Angus heifers and mature cows. Great economic index based on the production system)

**TI**  
**Terminal Index**

(Dollars per cow exposed under a Terminal Sire scenario)

HOOKS SHEAR FORCE 38K G A R MOMENTUM  
**HOOK'S BEACON 56B** ABC N918  
 HOOKS ZAFIRAH 41Z ABC G1045

Great example of why Beacon has been such an influential sire for our program. Lot 3 is one of the top Beacon sons to be offered, big call I know. An attractive bull that moves well has near perfect feet and leg structure, paired with a data set that excels in all key traits. Quiet and easy to handle bull.

 ABC H1102

HOOK'S BEACON 56B  
**ABC Q576**  
 ABC N1137

His sire is another top bull from the ABC H1102 x Momentum flush. Great option for heifer programs with plenty of calving ease. Will produce fertile highly efficient females that stay in the system.

ABC E538  
**ABC M816**  
 ABC E1030

Is a very interesting lot as he is one of the highest API lots but has a low yearling weight EPD. He is well suited to someone looking to reduce mature cow weight and improve calving ease. Will produce moderate easy doing females that require less feed to maintain body condition.

ABC B1189  
**ABC E1052**  
 ABC Z1389

Plenty of eye appeal in this soft, clean coated bull. His dam ABC E1052 is one of my favourites, she has just pregnancy tested in calf to AI with her 14th calf, she still looks like a young cow. Lot 52 is the top API bull in this pen, very interesting sire.

# Hicks Beef Bull Checklist

- ✓ **Moderate Birth** - we aim to have birth weights lighter than breed average
- ✓ **Specialist Heifer Bulls** - in all our breeds, top 20% calving ease
- ✓ **Weight Gains** - up in the top 20% of breed for 200 & 400 day weights
- ✓ **Mature Weights Less** than breed average, large cows need more maintenance
- ✓ **Carcass** - we believe muscle and yield will be demanded by industry and that marbling is an important trait
- ✓ **Temperament** - is important, we cull heavily on temperament, sale bulls and

- COWS
- ✓ **Structurally Correct** - we feel that we are competent enough to structurally assess bulls, but we know you want an independent professional. We use Liam Cardile from CTC to assess all our sale bulls for feet, legs, sheath and testicles
  - ✓ **Tested** - for known genetic abnormalities.
  - ✓ **Tested negative** - Pesti-virus carriers.

Born: **21/7/21** Reg Number: **UNREG** Tattoo: **S9**

MILWILLAH MARBLE BAR J53  
**HICKS MARBLE BAR N30**  
 HICKS RED PATRICIA K28

**HICKS DANDLOO Q173**  
 HICKS DANDLOO K124

This docile, growthy son of N30 is unregistered, giving commercial breeders an opportunity to buy an elite sire. We follow synchronised AI with a multiple sire back up joining. DNA identifies the back up sire, but unfortunately we could not identify his dam's sire. His genomically enhanced EPDs show a strong yearling growth, top 10% average daily gain, and top milk and marbling.

**HICKS MARBLE BAR N30**  
 HICKS RED PATRICIA K28

HICKS EMPEROR K3  
**HICKS BLK TOP RECORD M166**  
 HICKS TOP RECORD J123

Another son of the outstanding Hicks Marble Bar N30; a sire that is a trait leader of the breed for birth weight, top 1% calving ease and top breed value for short gestation. N30 combines this with good 400 day growth and strong carcass data. This moderate thick son duplicates his sire's figures and should be a great choice for heifer joinings with top 25% 400 day growth and top 1% marbling.

HICKS REDEMPTION M42  
**HICKS TOP RECORD P127**  
 HICKS TOP RECORD L42

This calving ease bull is sired by our new US AI sire 3SCC Domain, who has been one of the most used AI sires in the US. A sire that is thick, attractive and sound, siring progeny with great feet and sound udders and balanced figures. This son should be suitable for heifers with his great calving ease, birth weight and short gestation.

**HICKS MARBLE BAR N30**  
 HICKS RED PATRICIA K28

HICKS EMPEROR M132  
**HICKS RED PATRICIA P158**  
 HICKS RED PATRICIA K29

This bull is typical of what makes N30 sons so popular. This high profit son delivers beautifully across all the various measurements. Extreme calving ease, good growth, lower mature cow size, huge eye muscle – top 1%, top intra muscular fat and naturally, great profit selection indexes. This is a modern beef bull with many uses, but should be a top range heifer bull.

**HICKS MARBLE BAR N30**  
 HICKS RED PATRICIA K28

HICKS HENRY H61  
**HICKS RED PATRICIA N180**  
 HICKS RED PATRICIA F563

There is always someone that likes to be very careful with calving ease. Many of our sale bulls are in the top few percent for calving ease, but this fellow is well above the top 1%. If you are the careful type that wears a belt and braces, this is your heifer bull. He is ideal for someone without the time to be constantly checking calving heifers. He offers great carcass values with muscle, positive fat and marbling.

RED ANGUS SALE BULLS

## DIRECTIONS

**DELIVERY:** Stock awaiting delivery will be held free of charge for up to 14 days after the sale at the buyer's risk.

**GUARANTEE:** We have always provided full replacement guarantee against fertility and genetic faults. It is important that we are contacted as soon as possible to rectify any problem.

**FEEDING POLICY:** We believe that overfeeding can cause many problems to bulls long and short term. All our cattle are run in large paddocks under commercial cattle conditions. All Breedplan figures are assessed under these conditions usually from mobs of over 100 cows and calves.

As we sell our bulls younger than most studs we feel it is important that they are in suitable condition to withstand the rigours of their first season. The bulls are given a supplementary ration for 10 weeks, out in the paddock still in their calving groups.

All bulls are treated identically with no preferential treatment for the top bulls. We have sold bulls to many areas of Australia and have had no complaints about their mobility or fertility.

### Terms and Conditions of Sale

1. Subject to reserve prices, the highest bidder shall be the purchaser, and in the event of any dispute arising it shall be settled by the Auctioneer, unless one of the claimants will advance the bidding above the disputed bid, in which case the lot or lots shall be put up again.
2. The purchaser shall deposit the whole or any part of the purchase money if required at any time during the sale.
3. All stock shall be paid for in cash immediately on conclusion of sale, and prior to delivery, but, in the event of delivery being made, or possession obtained by the purchaser or his representative prior to the payment of the purchase money, or any cheque given on account of same, the purchaser shall hold the stock as trustee only for the vendor.
4. All stock shall be at the risk of the purchaser upon the fall of the hammer.
5. No warranty is given by the Auctioneers with any lot, and, as all lots are available for inspection previous to the commencement of the sale, the same are sold with all faults, if any.

The Auctioneers shall not be responsible for any errors or omissions in any particular appearing in the description or pedigrees of any lot for sale, and no error, omission, or misdescription in such particulars or pedigrees shall invalidate the sale or be made the subject of any claim for compensation.

#### Directions from the South

Take the Woomargama exit to the old Hume Highway. Turn right onto Annandayle Road.

#### Directions from the North

From Holbrook turn east down the Jingellic Road, travel 8.1kms then turn right into Annandayle Road and we are 2.8kms on the left.
