HICKS BEEF BULL SALE

Thursday 7th March 2024

Inspections from 10.00am

Sale Commences: 1.00pm

Auction in the sale barn with video presentation of each lot. All lots will be penned for your inspection on sale day. We encourage you to call and arrange an inspection prior to sale day.

39 Black Composite Bulls
17 Red Composite Bulls
14 Red Angus Bulls

We have poor mobile phone reception at our sale ring. Please call Phil from Elders to organise phone bidding.

ALL SALE BULLS GENOMICALLY ENHANCED FIGURES

Adding a DNA test to your decision is like knowing...

- ◆ 25+ calving ease scores
- ◆ 22 birth weights
- ◆ 25+ weaning weights
- ◆ 25+ yearling weights
- ◆ Stayability / productivity records on 15 daughters
- ◆ 6 carcass weights
- ◆ 10 marbling scores
- ◆ 8 ribeye area measurements

All this from a test you can complete before you wean the calf.

MORE ACCURATE FIGURES = BETTER BUYING DECISIONS

INDEPENDENT STRUCTURAL ASSESSMENT

How to Use The Beef Class Structural Assessment System

The Beef Class Structural Assessment System uses a 1-9 scoring system:

- A score of **5** is ideal (Note: Except for Temperament where a Score of 1 is ideal);
- A score of **4 or 6** shows slight variation from ideal, but this indicates most animals. An animal scoring 4 or 6 would be acceptable in any breeding program;
- A score of **3 or 7** shows greater variation but would be acceptable in most commercial programs.

However, seedstock producers should be vigilant and understand that this score indicates greater variation from ideal;

- A score of **2 or 8** are low scoring animals and should be looked at closely before purchasing;
- A score of **1 or 9** should not be catalogued and are considered culls.

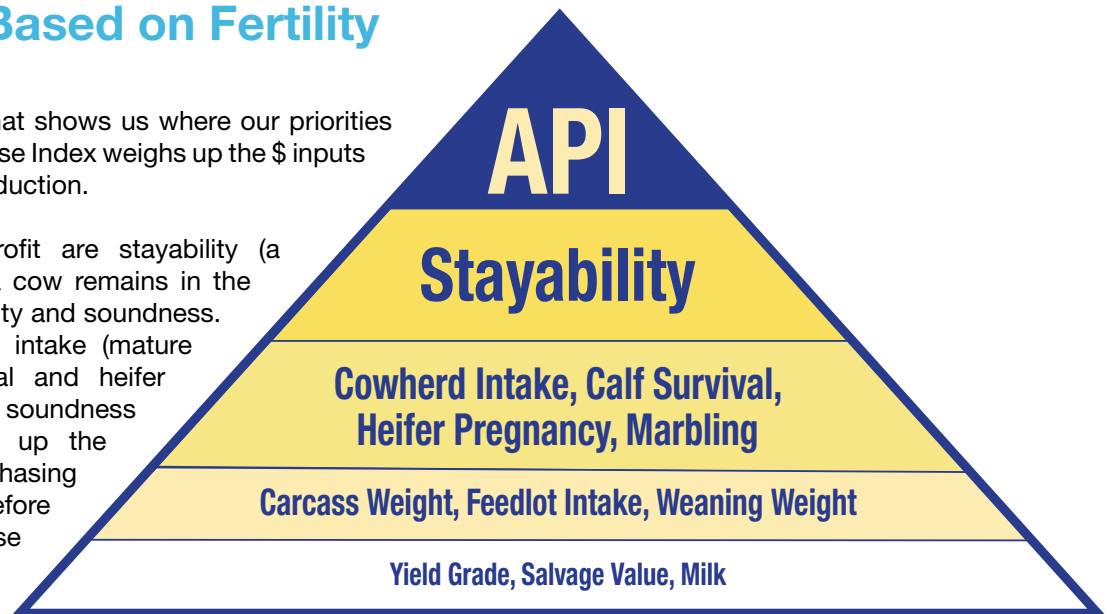

Liam Cardile on 0409 572 570

API – Profit Based on Fertility

API – the profit index that shows us where our priorities should be. The All Purpose Index weighs up the \$ inputs and outputs of beef production.

The big drivers of profit are stayability (a measure of how long a cow remains in the herd) a measure of fertility and soundness. Followed by cow herd intake (mature cow size), calf survival and heifer pregnancy. Yes, fertility, soundness and live calves make up the priority for breeders chasing higher returns, before weaning weight, carcass weight and feedlot intake.

Vet Check Information

All bulls presented in the auction have been fertility tested by the Holbrook Veterinary Clinic. They have passed an examination of their reproductive tract, which includes a testicular palpation, internal reproductive organ palpation and penis check. General health and structure are part of the course for this veterinary examination. Service ability testing and semen assessment have not been performed and we encourage all purchases to integrate their new bulls into the risk mitigation strategy that they employ back home.

QUICK GUIDE TO EPDS

CE
Calving Ease

- 375,000+ animals recorded annually
- 500 Sires progeny tested (now 60-70 per year)
- 35,000 matings on Angus Heifers (progeny tested)

BW
Birth Weight

MM
Maternal Milk

DOC
Docility

CW
Carcass Weight

YG
Yield Grade
(Lower ranks higher on percentile table)

API
All Purpose Index

(Dollars per cow exposed in a self replacing herd bred to both Angus heifers and mature cows. Great economic index based on the production system)

TI
Terminal Index

(Dollars per cow exposed under a Terminal Sire scenario)

WW
Weaning Weight
160 - 250 days

- 375,000+ animals recorded annually
- Progeny tested in 43 Feedlots

YW
Yearling Weight
330 - 440 days

ADG
Average Daily Gain
(Post Weaning Weight Gain)

MCE
Maternal Calving Ease
(Daughters calving ease as a heifer)

MWW
Maternal Weaning Weight
(Weaning weight due to growth and milk)

STAY
Stayability
(Percent of daughters remaining in the cow herd at 6 years of age)

MB
Marbling
(Based on actual marbling scores)

- 30 - 35,000 carcass scans per year
- 10,000 progeny test carcass recorded

BF
Back Fat
(Lower ranks higher on the percentile table)

REA
Rib Eye Area

Hicks Beef Steers – standout feedlot performance

Recently we had a call from Greenham’s buyer, Andrew Maddison, on the performance of a load of Hicks Beef steers finishing on 150 days of feed, the report was ”...if you put two steers together you could land a jumbo jet on their backs....”

Figure 1 Hicks Beef steers, custom feeding for Greenhams at Bunnaloo Feedlot, Moama.

Tom and Andrew visited Bunnaloo Feedlot, Moama, to see these steers for themselves. They were shown around by feedlot owner and manager, Shaun Mackenzie. Bunnaloo feedlot specialises in heavy turn off high quality steers, with most steers on feed for 180 days.

Shaun commented on the Hicks Beef steers, saying how pleased he was with the steers and how quickly they had gained weight. He also said how well the steers last year had done and how well they graded on the rail.

-----MSA Grading Results-----										
Hump	Oss	Mb	MSA	Mb	FC	MC	Rib	pH	EMA	Index
80	161	4.94	733	0			17	5.5	77	67.18

Figure 2 Average carcass data on the consignment.

Since we first published this article in the newsletter, the steers have been processed and we now have the kill data. We are exceptionally happy with the results, with 7 of the 48 steers achieving a marble score above 8 and the consignment averaging a marble score of 4.95. The average MSA score was a whopping 67.18, we were very happy with the steers from last year but these have stepped it up a notch.

BLACK COMPOSITE SALE BULLS

 Hicks Beef composite steer, January 2024

RED ANGUS ON IGS

We have been using the International Genetics Solutions (IGS) data base for our composite herd for nearly 10 years now and are very happy with how it has been working for us. Five years ago, we added the Red Angus herd for several reasons, it has enabled us to compare directly between the Red Angus and the composite herds, it has allowed us to bring in outside sires with more accuracy and it has allowed us access to genomically enhanced EPDs. Any of these reasons on their own is enough to justify the change.

Figure 3 Annual number of animals entered in the IGS database.

IGS is the largest cattle analysis in the world with over 20,000,000 animals, over 20 organisations paired with over 300,000 genotypes. It is a unique combination as they link the best science and technology with unprecedented collaboration.

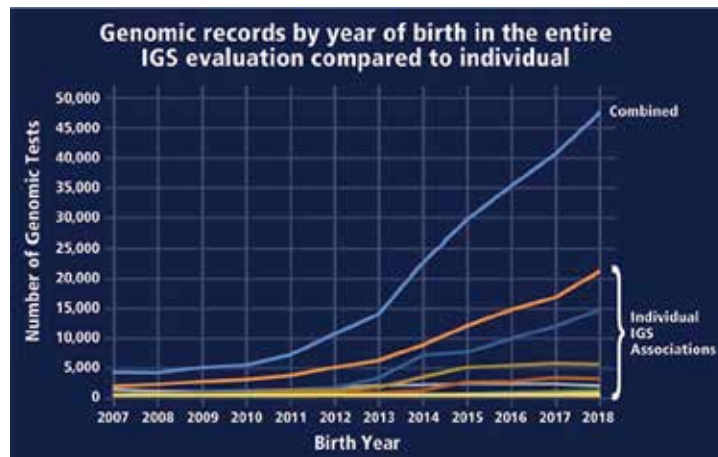

Figure 4 Annual number of genotypes submitted to IGS.

It is worth noting that all our Red Angus animals will still be registered with Breed plan and all data will continue to be submitted to Breed Plan.

HICKS HENRY M55
HICKS RED PATRICIA Q54
 HICKS RED PATRICIA K28

First son of Dunoon Double up to be offered in our sale, he has done a fantastic job for our program, with his progeny born small but growing fast. This is the highest API Red Angus bull we have ever offered at Hicks Beef. He is an attractive soft easy bull suited to join over heifers or cows. Low birth weight, ADG, docility, marbling, fat cover and API.

HICKS HENRY K82
HICKS FLAME P121
 HICKS FLAME L144

Dark red son of Dunoon Double up that will add a little extra frame and length. Great way to get some outcross black genetics into a red package. He takes elite marbling and carcass genes from Black Angus and blends it with high maternal merits of the Red Angus, note he is a leader for both marbling and stay.

RED ANGUS SALE BULLS

DIRECTIONS

DELIVERY: Stock awaiting delivery will be held free of charge for up to 14 days after the sale at the buyer's risk.

GUARANTEE: We have always provided full replacement guarantee against fertility and genetic faults. It is important that we are contacted as soon as possible to rectify any problem.

FEEDING POLICY: We believe that overfeeding can cause many problems to bulls long and short term. All our cattle are run in large paddocks under commercial cattle conditions. All Breedplan figures are assessed under these conditions usually from mobs of over 100 cows and calves.

As we sell our bulls younger than most studs we feel it is important that they are in suitable condition to withstand the rigours of their first season. The bulls are given a supplementary ration for 10 weeks, out in the paddock still in their calving groups.

All bulls are treated identically with no preferential treatment for the top bulls. We have sold bulls to many areas of Australia and have had no complaints about their mobility or fertility.

Terms and Conditions of Sale

1. Subject to reserve prices, the highest bidder shall be the purchaser, and in the event of any dispute arising it shall be settled by the Auctioneer, unless one of the claimants will advance the bidding above the disputed bid, in which case the lot or lots shall be put up again.
2. The purchaser shall deposit the whole or any part of the purchase money if required at any time during the sale.
3. All stock shall be paid for in cash immediately on conclusion of sale, and prior to delivery, but, in the event of delivery being made, or possession obtained by the purchaser or his representative prior to the payment of the purchase money, or any cheque given on account of same, the purchaser shall hold the stock as trustee only for the vendor.
4. All stock shall be at the risk of the purchaser upon the fall of the hammer.
5. No warranty is given by the Auctioneers with any lot, and, as all lots are available for inspection previous to the commencement of the sale, the same are sold with all faults, if any.

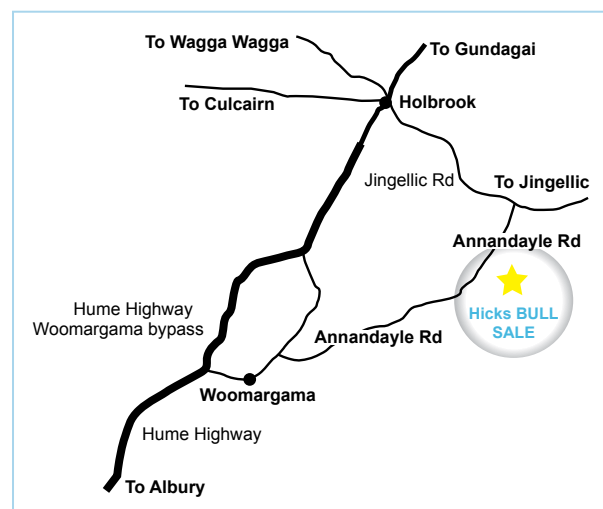

The Auctioneers shall not be responsible for any errors or omissions in any particular appearing in the description or pedigrees of any lot for sale, and no error, omission, or misdescription in such particulars or pedigrees shall invalidate the sale or be made the subject of any claim for compensation.

Directions from the South

Take the Woomargama exit to the old Hume Highway. Turn right onto Annandayle Road.

Directions from the North

From Holbrook turn east down the Jingellic Road, travel 8.1kms then turn right into Annandayle Road and we are 2.8kms on the left.
